

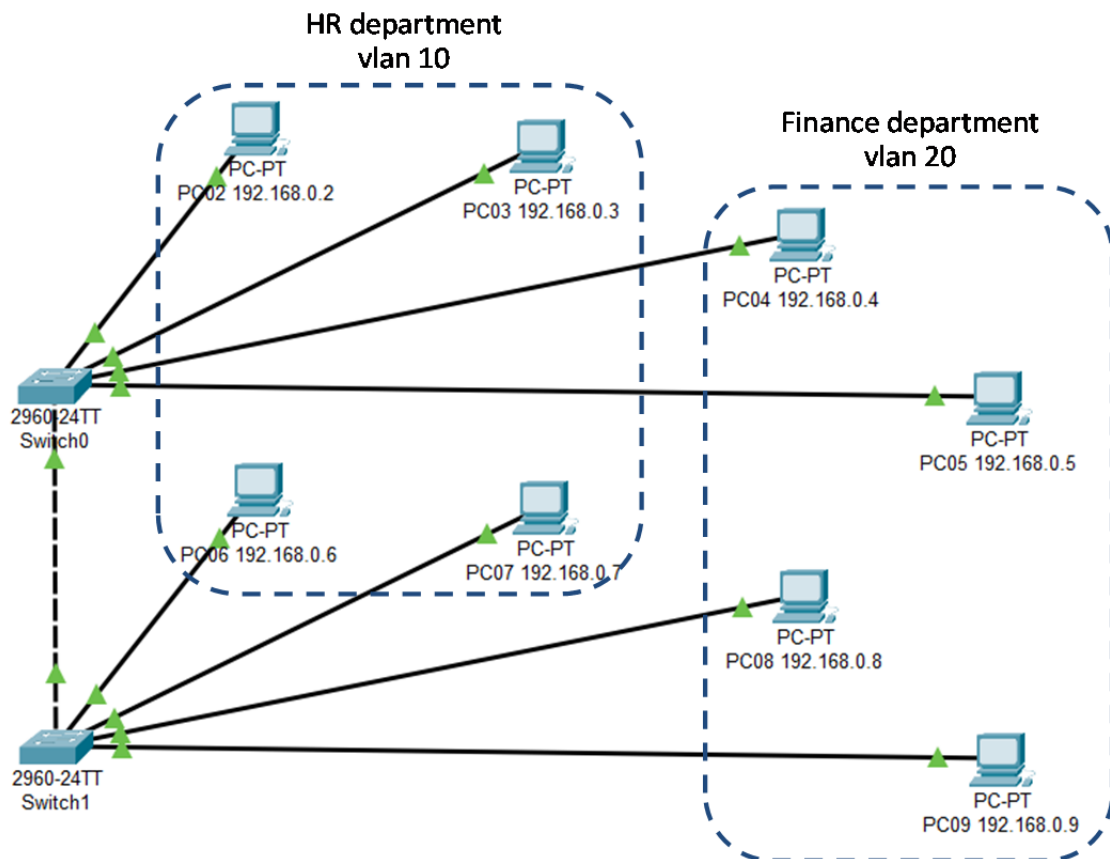

Figure 8

7. Try pinging from any PC to every other PC. Show your pinging results to the lab instructor.
8. Create trunk port on Switch0's Gigabit Ethernet port that is connected to Switch1. The commands are shown in Figure 9. The lab instructor shall show and explain each configuration steps. Note that the other switch (Switch1) can be configured manually or by using DTP - Dynamic Trunking Protocol. If DTP is used, "show interface trunk" command is used, their results will be different.
